## INSTRUCTIONS

### Short Pumpkin:

1. If you want to plan out your vines with a marker you can. Start by using a liner brush to paint on one stem in Olive You. Just one coat is sufficient .
2. To make the leaves, use your detail brush to make two small parentheses to make little leaves on the stem. We just did one coat.
3. Keep adding stems and leaves until you work your way around the whole pumpkin.
4. Finally use your medium brush to paint on 3 coats of Cinnamon Stick on the stem.

### Hammered Pumpkin:

1. Use your detail brush to add small flowers in the various colors. The easiest way to make a flower is just to do lines around in a circle with your detail brush, that makes the petals nice and thin. We used yellow, orange, and purple for the flowers.
2. Use your detail brush to apply the leaves in the teal and green in the spaces between the flowers.
3. Use your medium brush to apply 3 coats of Olive You to the stem.
4. Finally, use the stick end of your brush to tap on a cluster of small dots of Chocolate to the center of each flower.

## TIPS

- On the flowers and leaves, just one coat is necessary. This will give texture.
- We left the background unpainted for a crisp white contrast.
- The harder you push down your liner or detail brush, the heavier the brushstroke will be.
